

18 February 2023

Dear Customer

The new Plastic Packaging Tax (PPT) was introduced on 1st April 2022 across the UK.

The Government have implemented a tax on all plastics that do not have a minimum of 30% recycled content. The tax is charged at £200/T on the gross weight of the plastic product.

As an importer and supplier, we give an undertaking covering all relevant Plastic Packaging sold, that any Plastic Packaging Tax due under HMRCs Plastic Packaging Tax requirements is our responsibility and will be paid on time and in full.

Unfortunately, the tax is compulsory and therefore prices will inevitably rise across the industry and this is out of our control, however, we are offering alternative solutions

1. Recycled content film - although more expensive, these products are tax exempt.
2. Powerwrap - Thinner film with equivalent strengths to thicker films, reducing costs but not quality.

Please contact the sales team to discuss your requirements or for more information on PPT

From 1st April our invoices have an added line showing PPT charges on applicable products, you will need this information for your records.

Products purchased before the 1st April 2022 will be exempt from the PPT tax

Yours sincerely

Stephen Gillies
